

Development of bases of creation of nano- and picosatellites as space microlaboratories.

State registration –0110U002593

Head - Zbrutsky O.V.

Results

Bases of creation of midget space vehicles as space microlaboratories are worked out. Theoretical and experimental researches are conducted on creation of the systems of microsatellites, basic scheme-technical decisions are worked out, software is developed. The ground center of communication with microsatellites in the amateur range of frequencies for realization of space experiments is created
